TryHackMe: tryhackme.com/p/CipherGhost24

PROFESSIONAL SUMMARY

BCA graduate with an 8.30/10 CGPA and hands-on training in SOC operations, network security, ethical hacking, digital forensics, and vulnerability assessment. Experienced with Wazuh SIEM, Wireshark, Nmap, Burp Suite, Nuclei, Nikto, and Kali Linux for security monitoring, network analysis, reconnaissance, and incident triage. Top 2% TryHackMe practitioner with 100+ completed labs and practical experience building security tools, including an ML-based phishing URL detector, email header forensics analyzer, reconnaissance CLI, and PDF security tool. Seeking an entry-level SOC Analyst or Cybersecurity Analyst role to apply practical security skills in real-world environments.

TECHNICAL SKILLS

Networking & Security: TCP/IP, OSI Model, DNS, DHCP, HTTP/HTTPS, SSH, FTP, Subnetting, Port Scanning

SOC & Threat Defense: Wazuh SIEM, Alert Triage, Incident Response, Network Traffic Analysis, Digital Forensics, Email Forensics, VAPT, IOC Extraction, OSINT

Security Tools: Wireshark, Nmap, Burp Suite, Metasploit, SQLmap, Nikto, Nuclei, WPScan, Hydra, Kali Linux

Programming & Scripting: Python, Go, Bash, PowerShell, C, C++, Java, JavaScript, PHP

PRACTICAL SECURITY EXPERIENCE / TRAINING

SOC Operations Trainee — VRSecurity (Cyber Security Fundamentals Program) **Apr 2026 – Sep 2026**

- Monitored security events in Wazuh SIEM; prioritized and escalated malicious network anomalies.
- Ran reconnaissance with Nmap, Nikto, Nuclei, and Wireshark to find exposed ports and vulnerable services.

Cybersecurity Lab Practitioner & CTF Competitor — TryHackMe **Top 2% Globally**

- Completed 100+ labs: SOC L1 alert triage, network exploitation, web security, Linux privilege escalation.
- Rank 1 in Bronze ,Silver ,Gold leagues; 20+ badges, 100+ day streak.

PROJECTS

PhishGuard ML | Python, FastAPI, scikit-learn, React, SQLite, Docker

GitHub: github.com/ishasonaria568-prog/phishguard-ml Live: phishguard-ml-six.vercel.app

- Offline phishing URL detector using Random Forest and 16 static URL features.
- Classifies URLs as Safe, Suspicious, or Phishing; batch scans with CSV/JSON export and scan history.
- FastAPI + React app with SQLite storage and Docker support; no external API keys needed.

Email Header Forensics | Go, JavaScript, REST API

GitHub: github.com/ishasonaria568-prog/email-header-forensics Live: email-header-forensics.vercel.app

- Go parser that extracts authentication records, sender domains, and mail-routing hops.
- Detects SPF, DKIM, DMARC failures and Reply-To mismatches; classifies IPv4/IPv6 hops.
- 0–100 risk score with JSON report export; works offline for local analysis.

SubScope | Python, Multithreading, CLI

GitHub: github.com/ishasonaria568-prog/SubScope

- Multithreaded CLI for subdomain enumeration, DNS resolution, and HTTP/HTTPS verification.
- CSV and terminal reports for attack-surface mapping.

PDF Fortress | Python, CLI, GUI

GitHub: github.com/ishasonaria568-prog/pdf-fortress Live: pdf-fortress.vercel.app

- CLI and GUI tool for PDF security with password protection.
- Verifies output to confirm PDFs are protected correctly.

EDUCATION & CERTIFICATIONS

BCA — Bhakta Kavi Narsinh Mehta University | CGPA 8.30/10 | Sem 1 Rank 1 **2023 – 2026**

Cyber Security Fundamentals Program (CSFP) — VRSecurity | GRAND MASTER | ID-VRS-008 **Sep 2026**

Certified Cybersecurity Foundations (CORE) — Hackviser | HV-CORE-HO4ESOYZ **Jul 2026**
